# How Can My Investigations Suck Less? Safety Science 101

MAR  
13 Friday 13 March  
7:00 - 8:00 GMT+10

Virtual

## About Event

Have you ever asked yourself, 'Why do our investigations suck?'

If so, this is the webinar for you. With a frantic, caffeine-fuelled pace, I'm racing through dozens of safety science studies on common investigation pitfalls, weaknesses, and underpinning assumptions.

And, importantly, providing some evidence-informed suggestions on how to marginally improve.

Note: By joining this free webinar, you agree to being recorded and having the video uploaded to my YouTube channel.

Hosted By

 Ben Hutchinson

(Or here: <https://luma.com/p8z4avyr>)

## WE'RE COVERING THESE TOPICS AND MORE:

- How worldviews shape what you find & 'construct'
- Avoiding common investigation 'stop rules' & pitfalls
- Biases, priming and judgemental language
- Systems thinking
- Weak corrective actions AND MORE
